

ZERO WASTE DESIGN SERVICES

Work with real estate owners, architects, and property managers to design buildings that support low-waste goals. Clients include luxury residential tower, suburban residential rental complex, Fortune 500 new flagship building, and university campus dormitory

ZERO WASTE BUILDING INFRASTRUCTURE

- **Design loading docks to meet zero waste goals.** Estimate weight generation, material streams, and type of infrastructure building will need (bailers, compactors, refrigerated storage, chutes)

ZERO WASTE INTERIOR & AMENITIES

- **Embed zero waste design into interior of building.** Examples include amenities (lending libraries, swap spots, donation infrastructure), cafeteria systems (reusable and composting systems), office layout (signage, bins)

ZERO WASTE SUPPORT

- **Monitor building and educate tenants or residents following implementation.** Includes trainings, events, 1-1 meetings, donation support, establishing programs and partnerships, green teams, and compliance assessments
