

HIPPODROME: A LEED COMPLIANT WASTE AUDIT

Performed a LEED compliant waste audit required for the Hippodrome NYC building to apply for their LEED certification.

A Comprehensive LEED Waste Audit Report

- **Established a baseline** that identifies the types of materials in the waste stream and the amounts of each type by weight or volume.
- **Provided a detailed LEED compliant waste audit report** including a 100% of a day's waste: waste type, quantity in trash and recycling streams, percentage of waste type diverted and percentage of overall waste.

Building Type

- 500,000 RSF
- 100% Leased
- Majority general office & retail tenants

The Hippodrome building completed and submitted their **LEED application** and used our data to also consider starting a building-wide composting program.
